

August 2002

Project Purpose:

The purpose of this project is to improve traffic circulation and operations to the roadway in the vicinity of California State University of Fresno. Project Benefits to this area will include traffic congestion relief, reduction in travel time and the improved motorists' safety.

Description:

This project will make operational improvements to the roadway which will include: signalization, channelization, roadway widening and the installation of traffic surveillance equipment and turn pockets. Operational improvements will be made on Shaw, Chestnut, Willow, Ashlan, Woodrow, Herndon, Cedar, Bullard and Barstow Avenues near California State University of Fresno. With the completion of the Fresno State Save Mart Event Center these improvements are imperative.
